

YOKOR VUE SERIES

Redefining Minimalism

01

REINFORCED PROFILES

Reinforced profiles ensure structural integrity at scale.

02

DESIGN FLEXIBILITY

Available in 65mm, 75mm and 115mm profiles for maximum design flexibility.

03

LARGE GLAZING

Ultra-slim frames engineered to also achieve large-format glazing.

04

REAL MINIMALIST

Integrated sliding and sashless systems for a complete minimalist palette.

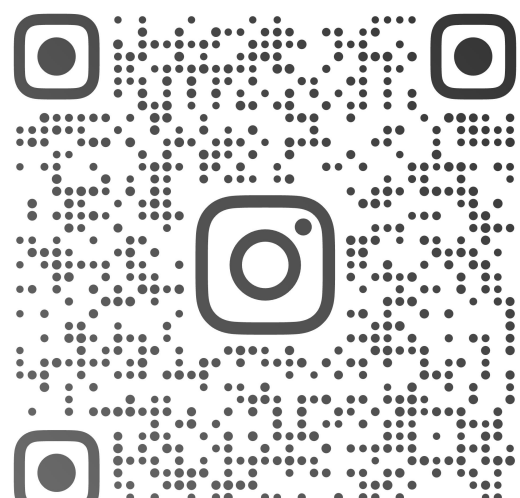

Ultra-slim aluminium systems engineered for expansive glazing, refined sightlines & uncompromising performance.

Minimalism is no longer a trend - it's the defining language of modern residential architecture. The YOKOR VUE Series is our flagship slim-frame system, purposefully developed in-house to meet the growing demand for expansive glazing, clean lines, and seamless indoor-outdoor flow in high-end Australian homes. Engineered to strictly comply with Australian standards, the YOKOR VUE Series achieves ultra-slim sightlines - even on oversized panels - through thickened profiles and reinforced structural design. Paired with the YOKOR Slim Sliding Door system, it offers a complete solution that unites refined aesthetics, performance, and creative freedom.

Beyond aesthetics, YOKOR VUE Series delivers industry-leading thermal efficiency. Our thermally broken systems exceed NCC energy requirements, helping projects meet or surpass 7-star standards — without compromising architectural intent.
